

De Vere Luxury Lodges

“ We trust MLR Networks to go the extra mile...”

To improve the facilities within each lodge, Cameron House wanted to install wireless internet and IPTV in all 86 lodges, allowing guests to stream media such as movies and sports as well as giving them access to video on demand..

However, they knew that a standard copper data cabling infrastructure would be problematic in this scenario, given the geography of the resort. Cat6 copper cabling would not be able to cope with the distances required, with quality of service diminishing sharply over distances of more than 100m. The alternative was fibre optic cabling, but to install this across the whole site would be prohibitively expensive. Cameron House Lodges, turned to their existing cabling supplier, MLR Networks and having worked with them for a number of years, they knew they could make it work.

CUSTOMER:

De Vere Luxury Lodges

OVERVIEW:

Cameron House Lodges is part of the De Vere Luxury Lodges Group and is made up of a mix of 86 owned and rented luxury lodges spread across the vast 108 acres of wooded parkland, dispersed around Loch Lomond. The setting is the five star Cameron House resort with leisure club, pool, bar/ restaurant, grill and world class Carrick golf course.

SOLUTIONS:

- Cabling
- Fibre Optics

"MLR Networks is always quick to respond, and understand my requirements exactly... they are efficient and professional, they do more than they expect to and always with good grace." Caroline Johnston, Exec Asst to RGM and Chairman, De Vere Cameron House.

Jo Stanford Group IT Director, De Vere Group

CABLING EXPERTS

As an expert in data cabling installation, MLR Networks designed the most efficient mix of fibre optic and Cat6 cabling which would deliver a high speed seamless internet service to all the lodges in the most cost effective way.

FIBRE OPTICS

Using existing underground ductwork, MLR Networks installed fibre optic cabling in two centrally located lodges. From there, further fibre optic cabling was installed to 13 lodges which would act as 'hubs' for the remaining lodges. From each 'hub' two external grade Cat 6 cables were installed to each of the lodges within that cluster. This ensures that within each lodge, each guest can enjoy the same highspeed internet service.

COLLABORATION

MLR Networks designed, managed, commissioned and tested all of the entire cabling network, working in collaboration with Cameron House and De Vere Resorts maintenance teams, and the IPTV supplier.

"The De Vere Group has been working with MLR Networks for a long time, more than 25 years, as they install cabling at all our hotels. Over the years, MLR Networks has built up a great wealth of knowledge about our business; they know our properties and how best to work in them, ensuring quality, timely installation whilst being considerate of our customers' needs. After working together for such a long time, I know we can trust them to do a great job."

WHO WE ARE

We are a network infrastructure specialist, with a range of market – leading Cisco solutions, copper and fibre optic data cabling and managed network services.

WHAT WE DO

We get to know your business and understand your needs, so we can recommend what's best for you. Our staff will work with your people to deliver the highest quality.

WHO WE DO IT FOR

Our customers come from all industries and sectors, from small single site operations to large multi-national corporations, both public and private sector.
